LEARNING FROM DISASTERS WORKSHOP

HIGHLAND TRAINING SERVICES

TRAINING LOCATIONS:
Mackay – Public Course
Onsite – Group Bookings

Learning Block 1-3 – Simtars eLearning Modules Online

Learners need to complete both components, the eLearning + Workshop

LEARNING BLOCK 1

Module 1: Disasters, Emergencies and Crises
Module 2: Patterns of Failure
Module 3: History of Mining Legislation, Health and Safety

LEARNING BLOCK 2

Module 4: Risk Management
Module 5: Process Safety
Module 6: High Reliability Organisations

LEARNING BLOCK 3

Module 7: Safety Culture
Upon completion of the eLearning modules, participants attend a practical 1-day workshop to cement learnings.

This course has been specifically tailored for statutory ticket holders to meet the mandatory 20-hour professional development requirement of the Practising Certificate Scheme and is endorsed by the Board of Examiners.

Beneficial to emerging leaders and those in supervisory positions who want to contribute towards building a safer workplace. The course incorporates recommendations and learnings from the Brady Review, including what it takes to become a high reliability organisation (HRO).

Learners will examine common patterns and trends in diverse disaster scenarios, enabling them to proactively assess potential risks within their own organisations.
